OBJECTIVE

Computer Science undergraduate (B.Tech – Data Science) with strong foundations in backend development, Java, and object-oriented programming. Hands-on experience building Spring Boot applications, RESTful APIs, and database-driven systems. Completed multiple internships across enterprise and training environments, working on backend logic, APIs, and AI-based solutions. Seeking an entry-level Backend / Software Engineer role.

SKILLS

Languages: java, python, JavaScript/TypeScript, SQL, C++, Dart
Backend & Infra: Spring Boot , Servlets ,JDBC , Rest APIs, Spring Security
Frontend & Data: React.js, HTML ,CSS, Tailwind, Bootstrap, PostgreSQL, MySQL, MongoDB

EXPERIENCE

Python Programming Intern - Infosys Dec 2025 – Present

- Worked on the **Fake Job Detection System** using Python and basic machine learning techniques.
- Performed data preprocessing, text cleaning and feature extraction on job posting datasets.
- Assisted in model training and evaluation to classify job listings as genuine or fraudulent.
- Gained practical experience in python-based ML workflows, debugging, and documentation.

AI Azure Intern - Microsoft May 2025 – June 2025

- Developed a **Health Detection System** using Azure AI services and Python.
- Worked on data preprocessing and AI model integration to generate health risk insights.
- Learned cloud-based AI pipelines and deployment fundamentals.

Java Developer Trainee -Wipro Talent Training Jul 2025 - Oct 2025

- Completed structured training in Core Java, Advanced Java, and Spring Boot.
- Built basic backend modules and REST APIs during hands-on exercises.
- Strengthened understanding of OOPS and backend application design.

PROJECTS

Course File Manager Portal—Java | Spring Boot | MySQL

- Designed and developed a secure**, role-based portal to manage academic files and course resources**.
- Implemented user **authentication and authorization** using Spring Boot and RESTful APIs.
- Developed modules for file upload, download, and access control for faculty members.
- Integrated MYSQL database to store user roles, file metadata , and access logs.

Fake Job Detection System— Python | Machine Learning |NLP

- Developed and ML-based system to **identify fake and fraudulent job postings**.
- Performed text preprocessing, feature extraction, and model training on job datasets.
- Helped improve awareness and detection of online job scam.
- Evaluated model performance and improved predication accuracy through parameter tuning.

CERTIFICATIONS

---

1. Java Certification
2. TCS Certification
3. Deloitte Technology/Digital Certification
4. Udemy Certification (java/Python)
