📌 Project Issues & Required Fixes (Dashboard-wise)

✅ Teacher Dashboard Issues

1. MyCourse Section Showing Wrong Courses

Current Issue:
MyCourse section me saare courses show ho rahe hain.

Expected Behavior:
Teacher dashboard me sirf wahi courses show hone chahiye jo **HOD ne us teacher ko assign kiye hain**.

---

2. Teacher Able to Add Courses

Current Issue:
Teacher khud se new course add kar sakta hai.

Expected Behavior:
Teacher ko course add karne ka option nahi hona chahiye.
Sirf **HOD** ko course create/assign karne ka permission hona chahiye.

---

3. Course File Approval Goes to All Subject Heads

Current Issue:
Jab teacher course file banata hai aur approval ke liye send karta hai, to file **sabhi Subject Heads ke dashboard** par chali jaati hai.

Expected Behavior:
Course file approval sirf **usi Subject Head ke dashboard** par jaana chahiye jo us specific course se linked ho.

---

4. Notifications Not Working (All Dashboards)

Current Issue:
Jab kisi file par comment aata hai, notification section me show nahi hota.
Ye issue Teacher, HOD aur SubjectHead sabhi dashboards par hai.

Expected Behavior:
Har new comment, approval, rejection, ya update par **real-time notification** show hona chahiye.

---

5. No Re-send Option After Editing Course File

Current Issue:
Teacher ne course file send kar di approval ke liye.
Baad me agar teacher file edit karta hai, to **dobara send karne ka option nahi milta**.

Expected Behavior:
Teacher jab file edit kare to **Resend for Approval** ka option mile.
New file old file ko **override** kare aur updated file phir se Subject Head ko approval ke liye jaye.

✅ HOD Dashboard Issues

1. Subject Head Not Assigned During Course Assignment

Current Issue:
Jab HOD kisi course ko assign karta hai, us course ke saath **Subject Head assign nahi ho raha**.

Expected Behavior:
Course assign karte waqt HOD ko option milna chahiye:

- Teacher select kare
- Subject Head select kare

---

2. Assigned Courses List Not Visible

Current Issue:
HOD dashboard me ye clearly visible nahi hai ki
kis teacher ko kaunsa course assign ho chuka hai.

Expected Behavior:
HOD dashboard me ek list/table ho jisme show ho:

- Course Name
- Assigned Teacher
- Assigned Subject Head

✅ Subject Head Dashboard Issues

1. Wrong Comment Author Name

Current Issue:
Agar multiple Subject Heads hain (e.g., Sachin – Python, Rahul – Data Science),
to jab Sachin comment karta hai, chat me **Rahul ka naam show hota hai**.

Expected Behavior:
Comment ke saath **actual logged-in Subject Head ka naam** show hona chahiye.

---

2. Reject Action Not Updating Course File & Teacher Dashboard

Current Issue:
Subject Head jab kisi PDF par comment karta hai, message show hota hai

lekin course file **reject status me nahi jaati**
aur Teacher dashboard par update nahi aata.

Sirf "Overall Return" karne par hi update aata hai.

Expected Behavior:
Jab Subject Head PDF par comment/reject kare:

- Course file ka status = Rejected
- Teacher dashboard par immediately update show ho
- Teacher ko notification mile

Multiple Roles & Dashboard Switching Problem

Example: Sachin ek hi system me HOD, Teacher aur Subject Head bhi ho sakta hai.

- HOD dashboard me switch option diya hua hai,
  jisse wo Teacher ya Subject Head dashboard par ja sakta hai.

Problems:

- Switch karne ke baad bhi system user ko HOD role me hi treat karta hai.
- Proper confirmation message nahi aata.

Expected Flow:

- Jab user switch kare:
  - HOD → Teacher
  - HOD → Subject Head
- Pehle confirmation popup aaye:
  "Aap Teacher/Subject Head dashboard par ja rahe hain. HOD session logout ho jayega. Continue?"
- Switch ke baad:
  - HOD dashboard logout ho
  - User ka role change ho jaye
  - User usi role ke permissions ke saath kaam kare.
- Agar user Teacher role me hai:
  - Usko bhi course assign ho sakta hai
  - Uski file approval Subject Head ke paas jaye.

- Subject Head ko bhi switch option mile,
  kyunki Subject Head bhi ek Teacher hota hai aur wo bhi apna course file bana sakta hai.
